Order

Factory calibration and adjustment

pls mark	Name	Description	Price*	Devices Serial number
<input type="checkbox"/>	BAPPU-classic	Factory calibration ¹ and adjustment of all measuring range (standard version); incl. Batteries	158,00 €	
		<input type="checkbox"/> with optional output calibration plus	79,00 €	
<input type="checkbox"/>	BAPPU-evo	Factory calibration ¹ and adjustment of all measuring range (standard version)	177,00 €	
		<input type="checkbox"/> with optional output calibration plus	85,00 €	
<input type="checkbox"/>	Anemometer	Factory calibration ¹ and adjustment of anemometer	64,00 €	
		<input type="checkbox"/> with optional output calibration plus	26,00 €	
<input type="checkbox"/>	IAQ-probe VOOO_{sx}	Factory calibration ¹ and adjustment; price depending on the version ² :		
		<input type="checkbox"/> with CO ₂ -sensor	68,00 €	
		<input type="checkbox"/> with VOC-sensor	45,00 €	
		<input type="checkbox"/> with CO-sensor plus	57,00 €	
		<input type="checkbox"/> with particulate matter sensor plus	123,00 €	
<input type="checkbox"/>		<input type="checkbox"/> with optional output calibration plus	28,00 €	
<input type="checkbox"/>	Globe-Thermometer	Factory calibration ¹	50,00 €	
Total order value:				
The prices are plus 19% VAT and shipping costs (18,- € per device within Germany).				

*Price changes and technical changes reserved. Prices are per device.

By default, a calibration is carried out at the input of the device. Subsequently, all measuring ranges are readjusted. An output calibration (after adjustment) is available as an option. All devices undergo a functional and plausibility check before delivery and comply with the technical specifications and measuring tolerances of the respective device.

- 1) The factory calibration always includes the adjustment of the measuring ranges if required. If an output calibration certificate (additional calibration after adjustment) is required, this must be known at the latest with the input of the device. There are additional costs for this. Retroactively, no output calibration certificate can be created. Werkskalibrierung umfasst immer auch die Justierung der Messbereiche falls erforderlich. Ist ein Ausgangs-Kalibrierschein (zusätzliche Kalibrierung nach der Justierung) erwünscht, muss dies spätestens mit dem Eingang des Gerätes bekannt sein. Hierfür fallen zusätzliche Kosten an. Rückwirkend kann kein Ausgangs-Kalibrierschein erstellt werden.
- 2) Only the calibration and adjustment of all installed sensors of the IAQ sensor is possible. ist immer nur die Kalibrierung und Justierung
